DATE OF INFO.

PLACE & DATE ACQ.

SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

1. Two roads of recent construction have been opened, crossing Route 82 at right angles. The first crossing lies slightly more than a half mile north, the second 2½ miles north, of the village of Gyulafiratot. Both roads extend east and west from the main highway. Towards the east, the second road has been cut through a dense forest; the eye can follow it for at least a mile to a point where the road runs up into the hills. 25X1

2. At the crossing of the first road and Route 82, new signs have been put up, giving the following place names in cyrillic letters:

   a. Nullapont (about two miles northeast of Gyulafiratot; see attachment);

   b. Rucsony (about one mile northeast of Nullapont);

   c. Doroga (not located on map. Doroga is a Russian word meaning "road.").

   There are no signs at the other crossing. Both routes are guarded and closed to normal traffic.[1]

3. Several antiaircraft batteries, each comprising about twenty 85-mm. guns which are not covered, have been installed 1¼ miles northeast of Veszprem, or about four miles from Nullapont. A Dumbo radar set stands nearby.[2]

4. A jet fighter regiment stationed at Veszprem-Szentkiralyszabadja, about 7½ miles from Nullapont, also helps to protect the area. A Token radar is located on the Megyhegy (hill) near the airfield.[3]

Comments: 25X1

1. The presence of signs with nothing other than cyrillic lettering appears to indicate that the directions are intended solely for Soviet personnel.

2. It is safe to assume that the antiaircraft units are meant to protect not only the city of Veszprem, but also the installations at Nullapont. The exceptionally large number of guns per battery, the fact that the guns are not covered up, and the most unusual presence of a Dumbo set indicate that 25X1

the protection of the area is receiving a high priority.

3. It appears certain that important Soviet installations are located north of Hajmasker. While they have not been definitely identified, the wooded and otherwise well camouflaged character of the region, its distance from inhabited locations, the recent construction of roads for the exclusive use of Soviet personnel, the exclusion of all outsiders from the site, the strong antiaircraft gun and fighter protection, and finally the persistent rumors about activity in the area, all raise the question whether either highly important storage facilities or missile-launching sites are located there.
